

DISHANT PARAKHIYA

Pursuing Bachelors in Computer Science and Engineering

parakhiyadishant1899@gmail.com | +91 81282 74719 | Ahmedabad, India | <https://www.linkedin.com/in/dishant-parakhiya>

[PORTFOLIO:- <https://dishantparakhiya.github.io/>]

EDUCATION

BTech in Computer Science and Engineering — LJ Institute of Engineering and Technology, Ahmedabad (2023 – 2027)

Class 12 - GSEB — BAPS Swaminarayan Gurukul, Gondal (2023)

Class 10 - GSEB — BAPS Swaminarayan Gurukul, Gondal (2021)

Languages known: English, Gujarati, Hindi, Marathi, Japanese

SKILLS

Languages: Python, JavaScript, Java, SQL

Tools & Platforms: Git, Github, VS Code, Supabase

Databases: MySQL, PostgreSQL, MongoDB

Libraries & Frameworks: Django, Bootstrap, Tailwind CSS, NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn

Web Development: HTML5, CSS3, React.js, Node.js, Express.js, Angular

PROJECTS

Campus Resource Management System (CRMS):

Designed and developed a web-based system to manage campus resources such as classrooms, labs, Sports Grounds and student requests efficiently. Implemented role-based access for admins and students with automated request tracking and approvals. Built using **Django (Python)** for backend logic, **SQLite/MySQL** for database management, and **HTML, CSS, JavaScript, Bootstrap** for a responsive frontend.

HealthMate | MERN Stack Web Application:

Developed a full-stack doctor appointment booking system that enables patients to book and manage appointments and doctors to manage availability. Built using **HTML, CSS, JavaScript**, and the **MERN stack (MongoDB, Express.js, React.js, Node.js)** with **REST API integration** and responsive UI.

AI Research Assistant (Perplexity Style):

Developed an AI-powered research assistant using **Python, FastAPI, LangChain, and OpenAI/Gemini LLM APIs** to perform real-time web search, extract and preprocess content with **BeautifulSoup**, and generate accurate, source-backed research summaries. Designed REST-based workflows for query handling, content aggregation, and structured summarization to minimize hallucinations and improve factual reliability. Implemented scalable backend architecture suitable for research automation and knowledge discovery platforms.

In addition to the projects listed above, I have built multiple academic and personal projects across Java, Python, HTML/CSS/JavaScript, MERN Stack, and Django as part of hands-on learning and coursework.

CERTIFICATES AND EXTRA ACTIVITIES

- Exploratory Data Analysis for Machine Learning • Inheritance & Data Structures in Java • Introduction to JAVA
- Introduction to HTML, CSS, JavaScript • Back-End Development with .NET
- Hack-NU-Thon 6.0 • Hackovate LJ 2025 • AI Tools Workshop (Be10x)
